Design Skills: User Research, Rapid Prototyping, Interaction Design, Visual Design, Design Systems, Accessibility

Tools: Figma, Sketch, Principle, and Balsamiq

Other Skills: HTML, CSS, JS, PHP, MySQL

Experience

Traveling & Freelance

MAY 2021 - Present, Remote

After working for about 5 years at different orgs, I took a career break to travel and experience the slow life in the mountains. I also intermittently worked as a freelance designer during this time.

Bounce / Product Designer

FEB 2020 - MAY 2021, Remote (India)

At [Bounce](#), I was a part of the supply team where I designed tools and experiences to run on-demand scooter rentals efficiently. I worked on [productivity improving app features](#) for Maintenance Executives, and [dashboards](#) that helped supervisors monitor the fleet, and maintenance work.

Helpshift / Product Designer II

JUL 2016 - JAN 2020, Pune (India)

I designed B2B SaaS products for Support Agents and Consumers at [Helpshift](#). My design work spanned across different areas of the product like Agent Dashboard, Analytics and Data Visualisations to show a support team's performance, AI features that improve their productivity, making the

embeddable Webchat widget accessible for disabled consumers, etc.

Exotel / Product Intern

JUL 2015 - DEC 2015, Bengaluru (India)

During this internship, I designed and developed an internal tool for the Sales and Marketing teams to gamify their work. This tool imports data by integrating with multiple sources like Pipedrive, Intercom, internal DBs..

Education

BITS Pilani / M.Sc. (Hons) - Economics, and B.E. (Hons) - Electrical & Electronics Engineering

AUG 2011 - JUN 2016, India

Awards

Part of the winning team at a company-wide Hackathon at Bounce. There were ~80 participants in total.

Personal Projects

- [Vocabio](#) (2017) - An android flashcards app to learn vocabulary for GRE & TOEFL. Not available now.
 - Twideos (2015) - An interaction prototype to stream and control twitter videos on a TV display using SMS.
 - [Muted News](#) (2014) - A news blogging platform that I had built in college. Shutdown as the traction was very limited.
